IMPASSA – Power Save Mode / Additional WT5500 Keypad

The IMPASSA Self-Contained 2-Way Wireless Security System supports the addition of a WT5500 (2-Way Wireless Keypad). There is a scenario where the Power Save Mode option in the WT5500 keypad may become disabled. This occurs for IMPASSA units built prior to January 11, 2012.

In order to prevent this from occurring, option #6 in the 'Third Keypad Options' section of the IMPASSA system should be enabled when adding the WT5500 to the system. To enable this option, the procedure outlined below should be conducted at the IMPASSA on-board keypad (not the WT5500 keypad):

1. Enter Installer Programming by pressing: [*][8] [Installer Code]
2. Enter Local Keypad Programming by pressing: [*]
3. Enter the Third Keypad Option section by pressing [076]
4. Ensure option 6 is ON

Please Note: IMPASSA units built after January 11, 2012 have this option enabled by default.
